PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 6+ years of experience designing and shipping production-grade web applications for SaaS platforms, HRMS systems, and real-time dashboards. Deep expertise in React.js, TypeScript, Node.js, NestJS, and PostgreSQL, with hands-on experience in Docker, AWS, and CI/CD pipelines. Proven ability to own features end-to-end — from architecture and API design to deployment and performance optimization. Collaborative remote worker with a track record of mentoring developers and delivering measurable impact at startups and enterprise teams alike.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Vue.js, Nuxt.js, TypeScript, JavaScript, TailwindCSS, Redux, Zustand, HTML/CSS

Backend: Node.js, NestJS, Go (Golang), Express.js, REST APIs, GraphQL, Prisma

Databases: PostgreSQL, SurrealDB, MySQL, DynamoDB, Firebase

Cloud & DevOps: AWS, Docker, Kubernetes, Apache, Linux, CI/CD, Cloudflare Pages, Git

Other: AI Integration, Socket.io, JWT, Google Maps API, Agile / Scrum

PROFESSIONAL EXPERIENCE

Freelance Software Developer | *May 2025 – Present* | *Remote*

- Architected and launched a real-time platform with role-based dashboards supporting 100+ concurrent users.
- Built live tracking, notification, and reporting modules that cut manual reporting effort by 40%.
- Optimized React/Zustand state management, eliminating 60% of unnecessary re-renders and improving perceived performance.

Software Developer | Bardar Sydney | *May 2024 – Jan 2025* | *Remote*

- Delivered full-stack admin and event management platforms serving multiple product teams across the organization.
- Boosted API response times by 30% through query optimization and efficient use of Prisma ORM with PostgreSQL.
- Designed and maintained PostgreSQL schemas handling 10,000+ records with real-time read/write operations.

Freelance Software Developer | *Oct 2023 – Mar 2024* | *Remote*

- Built a high-throughput barcode generation platform capable of processing 1,000+ labels per batch.
- Developed an interactive geospatial visualization tool using real-time map data (Google Maps API).
- Delivered multiple full-stack applications using Next.js and Node.js from kickoff to production deployment.

Software Developer | Trailblazer IT Solutions | *Jun 2023 – Sep 2023* | *Myanmar*

- Built a real-time delivery tracking app used daily by 50+ active drivers, integrated with Google Maps API and Firebase.
- Reduced status update latency by 70%, significantly improving fleet visibility and operational efficiency.

Software Developer | Evercomm Singapore Pte Ltd | Nov 2019 – May 2023 | Remote

- Led full-stack development of HRMS, survey, and restaurant management systems serving 200+ end users.
- Designed and shipped 30+ REST API endpoints with reporting modules enabling real-time analytics for business teams.
- Mentored junior developers, established coding standards, and contributed to key architecture decisions across multiple products.

PERSONAL PROJECTS

FindEain — Myanmar Rental Marketplace — *Nuxt.js, NestJS, PostgreSQL, Prisma, Socket.io*

- Independently designed and built a full rental marketplace with property listings, booking flows, payment processing, and real-time chat from scratch.

Myanmar Video Recap Tool — *Vue.js, Node.js, Python, Docker, FFmpeg, AI Integration*

- Self-initiated AI-powered pipeline that converts YouTube videos into Myanmar-narrated recap content, handling transcription, translation, and audio synthesis.

Dota 2 Esport Tracker — *Go (Golang), Gin, PostgreSQL*

- Personal project built to learn Golang — live tournament tracker integrating OpenDota and PandaScore APIs for real-time match statistics.

Myanmar Novel Reader — *Nuxt.js, Node.js, DynamoDB, Docker*

- Side project delivering an SSR reading platform with multilingual content, admin CMS, and fully containerized deployment on Docker.

EDUCATION

Bachelor of Computer Science (B.C.Sc) — University of Computer Studies, Mandalay

2014 – 2019
